## **DDNS** solution

- 1. Please log on camera via IE.
- 2. Find below interface, and set the below service ports. The all 3 ports are required to set.

	Live	Playback	Alarm 🧕	Local Setup	Configuration		
		Serv	ice Ports				
0	Camera	c	DNVIF				
	Network	Ē	Enable	<u>.</u>			
			Authentication				
	Basic	L.	HTTP Port	8090	(80,1000~65535)		
	Service Ports	C	Control Protocol				
			Enable				
		1	Port	8091	(1000-65535)		
	Connect Check						
"(_)"	Event		RTSP Authentication	<b>V</b>			
	Lvent		Port	8092	(554,1000~65535)		
٢	Storage			0032	,1000-00000)		
	System	H	нк				
			Enable	<b>V</b>			
()	Information		Authentication				
		5	Port	8000	(1000~65535)		
			DAHUA				
		Ę	Enable				
		A	Authentication				
		F	Port	37777	(1000~65535)		
					-		
				Reset Defaults	Refresh	Save	

3. Add all 3 service ports to your router. Please log into router and set properly.

Then you can visit camera remotely. (Eg.http//your dormain name:8090)
